

Arush Jain

+91 91713 56822 — jainarush423@gmail.com — LinkedIn — LeetCode — GitHub

Summary

B.Tech student specializing in Smart Manufacturing with a strong foundation in Data Structures, Algorithms, and full-stack software development. Experienced in building and deploying scalable web applications using React.js, Next.js, Node.js, and REST APIs, with working knowledge of system design, authentication, and cloud deployment on AWS and GCP. Proven ability to independently architect and ship end-to-end products — from AI-integrated platforms to browser extensions — through academic and personal projects. Seeking to apply strong problem-solving and engineering fundamentals to build reliable, production-grade software.

Education

IIITDM Jabalpur

2023 – Present

B.Tech in Smart Manufacturing

Technical Skills

Languages: JavaScript, TypeScript, Python, C++

Frontend: React.js, Next.js, Tailwind CSS, HTML, CSS, Responsive UI Design, Shadcn/UI

Backend: Node.js, Express.js, REST APIs, Authentication, Socket.IO, WebRTC

Databases: MongoDB, PostgreSQL, Supabase

Tools: Git, GitHub, Docker, Postman, Figma, GitHub Actions

AI & Cloud: Gemini Integration, Whisper API, Google Cloud Platform, AWS

Core CS: Data Structures, Algorithms, Object-Oriented Programming, System Design

Projects

Duffy

Next.js, Node.js, WebRTC, GEMINI, Whisper

AI-powered Real-time Communication Platform

- Built a real-time communication platform with responsive dashboards and reusable UI workflows.
- Integrated REST APIs, authentication systems, GPT-4 features, and Whisper-based live transcription.
- Developed reusable frontend components including forms, cards, modals, and interactive layouts.

LeetLens

TypeScript, Chrome Extension API, Gemini API, React

AI-Powered Coding Assistant for LeetCode

- Built an intelligent browser extension that provides AI-powered assistance directly within LeetCode without disrupting the coding workflow.
- Implemented multi-level hint generation, problem analysis, algorithm explanations, complexity analysis, and contextual debugging using Gemini AI.
- Designed an interactive chat interface with conversation history, dark/light themes, BYOK (Bring Your Own API Key), and persistent local storage.

Velora

Next.js, TypeScript, AI-Assisted Development

AI-Powered Resume Builder Platform (Under Development)

- Designing and developing an AI-powered resume builder that generates ATS-friendly resumes, analyzes job descriptions, and provides personalized resume optimization suggestions.
- Architected the complete product workflow including resume generation, job tracking, template management, user authentication, and AI-driven content enhancement features.
- Leveraged AI-assisted development tools to accelerate implementation while independently designing the system architecture, user experience, feature specifications, and application structure.

Patent

Automatic Footrest Assembly for Two Wheeler

2025

- Designed a sensor-based automation system using embedded controllers and pressure sensors.
- Implemented hardware-software integration workflows with fail-safe operational logic.

Achievements

- **Google Cloud Arcade Facilitator Program** - deployed cloud-native applications on GCP using Compute Engine and Cloud Run.
- Selected for **Amazon ML Summer School 2026 (AMLSS)**, a competitive program focused on Machine Learning and Applied Data Science.

Co-Curricular Activities

- Organized and managed College Literature Club events, coordinating execution, logistics, and team workflows.
- Active member of a community Run Club, co-organizing running events and group games.
